The North East Enterprise Region

The North East Enterprise Region has a robust population over 40,000 people and includes the City of Melfort, the Towns of Arborfield, Carrot River, Choiceland, Hudson Bay, Kelvington, Naicam, Nipawin, Porcupine Plain, Preeceville, Tisdale, and several rural municipalities that each holds their own unique attributes. There are a number of community based development groups and a diverse industry base from agriculture to forestry to tourism to potential mining opportunities and oil and gas exploration in and near this region.

The North East Enterprise Region (NEER) mission is to facilitate the attraction of business, people, wealth, and investment to our region.

The North East Enterprise Region has collected key community information to assist individuals in exploring development opportunities in north eastern Saskatchewan.

Regional Transportation Linkages

Rail services

North East Saskatchewan is serviced by a main Canadian National (CN) Line that runs directly through the region up to the Port of Churchill. There are also several Canadian Pacific (CP) and CN branch lines and short lines in the area. The railway network in this region provides excellent support for industry growth and export readiness.

Thunder Rail and Torch River Rail offer short line rail services in the region.

Highways and grid roads

North East Saskatchewan is well connected by Saskatchewan’s provincial highways. Running North/South are provincial highways, #6, #35, and #9 and running East/West there are provincial highways #55, #3 and #49. Highway #6 is known as the Canam Highway, which runs from Canada to Mexico. Highway #9 is also known as the Saskota Flyway because it’s an international highway extending from North Dakota up past Hudson Bay, to the Manitoba border. The highway surfaces are mostly categorized as either paved or granular. There are sections of highway #55 and #9 (North of Hudson Bay), that are gravel. Most of the highways in the region are primary weight, seasonal primary weight and secondary weight.

Available Power Capacity and Usage from SaskPower

As the principal supplier of electricity in Saskatchewan, SaskPower serves more than 445,000 customers and manages \$4.2 billion in assets. SaskPower has over 2,400 permanent full-time employees located in 71 communities.

SaskPower operates three coal-fired power stations, seven hydroelectric stations, four natural gas stations and two wind facilities with an aggregate generating capacity of 3,214 megawatts (MW). SaskPower also has purchase agreements with the Meridian Cogeneration Station, Cory Cogeneration Station, SunBridge Wind Power Project and NRGreen Kerrobert Heat Recovery Project. Total available capacity is 3,668 MW.

SaskPower maintains more than 155,000 kilometres of power lines, 52 high voltage switching stations and 174 distribution substations. SaskPower also operates three wholly-owned subsidiaries - SaskPower International, NorthPoint Energy Solutions and SaskPower Shand Greenhouse.

SaskPower has three-phase 25 kV power services in Kelvington. The exact electrical requirements from a potential customer will need to be identified once the potential customer has been identified. SaskPower works with customers to ensure the customer has the electricity required to run their facilities. SaskPower is responsible for making electrical service available if required by the customer. Commercial customers typically require 25 kV service (or below) which is available in Kelvington.

The critical issue for SaskPower is the time required to install a transmission service (72 kV, 138 kV, and 230 kV) if required by the customer. Depending on the length of line required, SaskPower can require three years notice to ensure transmission facilities are installed when required by the customer. This lead time typically works nicely with the customer's requirements to build new plants and install equipment prior to needing the electricity to energize it.

Natural Gas services from SaskEnergy and TransGas

SaskEnergy is Saskatchewan's natural gas distribution company, a provincial Crown corporation in operation for over half a century in Saskatchewan.

SaskEnergy delivers the benefits of safe, convenient and environmentally friendly natural gas to more than 347,000 residential, farm, commercial and industrial customers throughout Saskatchewan. SaskEnergy purchases natural gas from independent suppliers and transport it through a 67,000-kilometre distribution system to 92% of Saskatchewan communities.

SaskEnergy has natural gas facilities in Kelvington.

There are many factors attributing to the availability of natural gas for industrial customers. Specific site location as well as the load requirements of the plant are the most crucial. Once there is a specific site location and specific load requirements, SaskEnergy can prepare a design and cost estimate for natural gas service to the plant.

Generally on larger projects, we require 6-8 weeks for a design and pending the size of the project, construction can require 6-8 months lead time before the natural gas service is installed.
