The North East Enterprise Region

The North East Enterprise Region has a robust population over 40,000 people and includes the City of Melfort, the Towns of Arborfield, Carrot River, Choiceland, Hudson Bay, Kelvington, Naicam, Nipawin, Porcupine Plain, Preeceville, Tisdale, and several rural municipalities that each holds their own unique attributes. There are a number of community based development groups and a diverse industry base from agriculture to forestry to tourism to potential mining opportunities and oil and gas exploration in and near this region.

The North East Enterprise Region (NEER) mission is to facilitate the attraction of business, people, wealth, and investment to our region.

The North East Enterprise Region has collected key community information to assist individuals in exploring development opportunities in north eastern Saskatchewan.

Regional Transportation Linkages

Rail services

North East Saskatchewan is serviced by a main Canadian National (CN) Line that runs directly through the region up to the Port of Churchill. There are also several Canadian Pacific (CP) and CN branch lines and short lines in the area. The railway network in this region provides excellent support for industry growth and export readiness.

Thunder Rail and Torch River Rail offer short line rail services in the region.

Source: Adapted from Saskatchewan Highways and Infrastructure Rail Network Map

Highways and grid roads

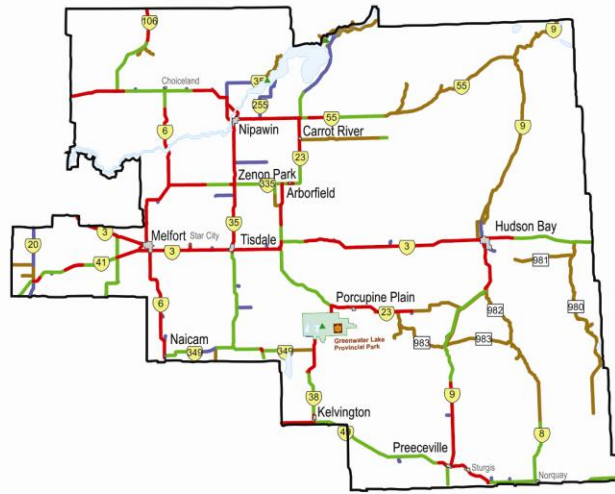

North East Saskatchewan is well connected by Saskatchewan’s provincial highways. Running North/South are provincial highways, #6, #35, and #9 and running East/West there are provincial highways #55, #3 and #49. Highway # 6 is known as the CanAm Highway, which runs from Canada to Mexico. Highway #9 is also known as the Saskota Flyway because it’s an international highway extending from North Dakota up past Hudson Bay, to the Manitoba border. The highway surfaces are mostly categorized as either paved or granular. There are sections of highway #55 and #9 (North of Hudson Bay), that are gravel. Most of the highways in the region are primary weight, seasonal primary weight and secondary weight.

- Class 4
- Class 5
- Class 6
- Class 7
- Saskatchewan Highway
- City Boundary
- Local Highway Number Shield
- National Highway Number Shield
- Provincial Highway Number Shield

- Class 2:** Roads which serve communities or Indian Reserves of greater than 1,000 population, flagship parks and link hospitals to regional hospitals or base hospitals.
- Class 3:** Roads which serve communities or Indian Reserves of greater than 500 population and larger provincial or regional parks or historic sites. These roads link special care homes or health centres to hospitals.
- Class 4:** Roads that serve communities of greater than 100 population, large industrial sites and parks with greater than 25,000 yearly visitations. These roads generally have a network spacing of 20 kms, carry 40,000 tonnes annually with 100 vehicles per day and serve as an inter-municipal link.
- Class 5:** Roads that serve communities of less than 100 population, medium industrial sites and parks with greater than 10,000 yearly visitations. These roads generally have a network spacing of 10 kms, carry 10,000 tonnes annually with 50 vehicles per day.
- Class 6:** Roads that provide access to individual residences and small industrial sites as well as school bus routes.
- Class 7:** Roads that provide land access.

Air services

There are several airports in the region. There are locally operated municipal airports in Melfort, Tisdale, Nipawin, Arborfield, Porcupine Plain, Kelvington and Preeceville. The Province of Saskatchewan operates the Hudson Bay airport as a fire protection base, part of a larger Saskatchewan fire protection base network. This provincial airport has the capacity to land several sizes of airplanes.

Town of Porcupine Plain Municipal Services

Cost of Building Permits

The Town of Porcupine Plain has employed David Petersen as the building inspector. Mr. Petersen is from Nipawin, SK.

Building inspection costs have been \$140.00 for each inspection. With a new home going up there are generally 5 visits. With a garage (detached) usually only 2 visits.

Building Permits have a minimum fee of \$10.00 or \$1.00/\$1,000 of value of construction (excluding land value) for the first \$5,000 of value of construction and .50 cents/\$1,000 for additional values of construction or fraction thereafter.

Local Tax Incentives

TOWN OF PORCUPINE PLAIN
BYLAW #7-10
A BYLAW TO PROVIDE FOR
PROPERTY TAX EXCEPTIONS FOR THE
PURPOSE OF ENCOURAGING DEVELOPMENT

The Council of the Town of Porcupine plain, in the Province of Saskatchewan, under the provisions of Sections 295 of The Municipalities Act, enacts as follows:

- 1) The assessed owner of a taxable residential property shall, upon moving in and securing a mobile home building – or a modular home building – with a market value of at least \$50,000, shall receive the benefit of the following property tax exemption:
 - a) Twenty –five percent (25%) of said building’s taxable assessment shall be made exempt for each of the four taxable years immediately following the moving in of the building.
- 2) The assessed owner of a taxable residential property shall, upon construction a new residential building – or moving in a new pre-fabricated house building – with a market value of at least \$ 50,000, shall receive the benefit of the following property tax exemption.
 - a) The taxable assessment for said building shall be made exempt for the year during which:
 - i) The construction of the new residential building is commenced; or
 - ii) The new pre-fabricated house building is moved in; and
 - b) The taxable assessment for said building shall be made exempt for the two years following the year during which:
 - i) The construction of the residential building is commenced; or
 - ii) The new pre-fabricated house building is moved in.
- 3) The assessed owner of a taxable commercial property shall, upon construction a new commercial building – or moving in a pre-fabricated commercial building –with a market value of at least \$20,000, shall receive the benefit of the following property tax exemptions:
 - a) The taxable assessment for said building shall be made exempt for the year during which:
 - i) The construction of the new commercial building is commended; or
 - ii) The new pre-fabricated commercial building is moved in; and

- b) The taxable assessment for said building shall be made exempt for the two years following the year during which:
 - i) The construction of the new commercial building is commenced; or
 - ii) The new pre-fabricated commercial building is moved in.
- 4) The assessed owner of a taxable residential property, or a taxable commercial property, after having purchased a Building Permit from the Town of Porcupine Plain for the improvement of, or addition to, the existing building(s) on said property, shall receive the following exemption:
 - a) The taxable assessment for said improvement or additional shall be made exempt for the year following the date of the Building Permit.
- 5) Bylaws #8-02, #9-04, and #7-07 are hereby repealed.

Taxes and Utility Rates

Property Taxes

In order to calculate a property’s annual municipal tax, you must multiply the fair value of the property (assessed) x provincial taxable percentage x mill rate/1000 x mill rate factor.

2010 Base Tax - Porcupine Plain				
Property Class	Assessed As			
	Land	Improvements	Land & Improvements	Property
Agricultural	\$630.00	\$70.00	\$700.00	\$700.00
Residential	\$630.00	\$70.00	\$700.00	\$700.00
Commercial, Industrial	\$650.00	\$250.00	\$900.00	\$900.00
Motel, Hotel	\$650.00	\$250.00	\$900.00	\$900.00

2009 Mill Rate	Tax Tools				Municipal Mill Rate Factors				
	Base Tax	Min Tax	MRF	Uniform Municipal Mill Rate	Agriculture	Residential	Multi-Unit Residential	Commercial & Industrial	C & I - Motel, Hotel
PORCUPINE PLAIN	Y	N	Y	5.0000	1.0000	1.0000	1.0000	1.2000	0.5000

In order to calculate a property’s annual education tax, you must multiply the fair value of the property (assessed) x provincial taxable percentage x mill rate/1000 x mill rate factor.

Provincial 2010 Mill Rate - Education	Mill Rate
Residential Property	10.080
Commercial (Less than \$500,000) Rate	12.250
Commercial (\$500,000 to \$5,999,999) Rate	15.750
Commercial (Greater Than \$6,000,000) Rate	18.550
Agriculture	7.0800

Water Supply

The amount of cubic meters of treated water in the local reservoir is 1,042.3.

Treated water storage is intended to provide a reserve of water to meet domestic demands, plant operating requirements, to provide water during maintenance periods, and for firefighting purposes. The storage equalizes peaks in consumption in excess of the treatment capacity. Treated water storage facilities should be sized to provide two average days consumption as a minimum capacity. The reliability of the water supply and treatment systems should also be considered in this sizing.

As reported in the WSA, the gross capacity of the reservoirs is 1,042 m³, which exceeds the projected 20 year requirement of 740.4 m³. The fire flow and peak day demand provided by the proposed high capacity pump is 61.14 Lps, which should be guaranteed for a 1.25 hour to 1.5 hour duration. Thus, the total volume, at 1.5 hour duration required for fire protection, is 330.2 m³, which must be available at any time during the operating day. The domestic demand may consume half of the storage volume by mid-day. This would mean that the existing reservoirs would have 521.2 m³ of storage available, where 330.2 m³ is required. As the scenario would leave 191 m³ in storage, then the storage volume of the reservoir is considered adequate in size.

Under distribution conditions at the estimated peak hour demand, the analysis indicates that the existing distribution system, for the most part, is adequately sized. The available pressure at the farthest points in the system are 336 kPa in the east area, 280 kPa in the south, and 283 kPa in the southwest, which exceeds the minimum recommended pressure of 241.3 kPa. The capacity of the existing distribution pumps exceed the projected 20 year peak hour demand of 17.70 Lps, as reported in the WSA.

The water mains are looped in most areas, which provides for alternative distribution routes during system maintenance and repair, with the exception of the southwest and northern areas. The southwest area is fed by a single 150 mm. dia. Main extending west on oak Street. To provide for enhanced distribution and fire flows in the area, the 150 mm. dia. Water mains, complete with fire hydrants and gate valves, should be extended at the following locations:

- Rose Avenue from Walnut Street to Oak Street
- Pine street from Katherine Avenue to Larwood Avenue, and Larwood Avenue from Pine Street to Birch Street

The northeast area is fed by a single 150 mm. dia. Main extending south from the highway on 1st Street East to Ash Street North. To provide for enhanced distribution and fire flows in the area, the 150 mm dia. Water mains, complete with fire hydrants and gate valves, should be extended at the following locations:

- Ash Street North from McAllister Avenue to First Street East,
- Highway No. 23 (Poplar Street) from First Street East to Second Street East, and Second Street East to 100 m South

The requirement for the looping in the areas is more critical for meeting fire flow demands to major institutional and recreational facilities, including the Care Home, Elementary School, Arena and hospital. The appended Water Distribution Plan shows the recommended water main looping, fire hydrants and appurtenances. Future distribution system upgrading should include replacement of the 100 mm. dia. main sections with 150 mm dia mains and looping on Ash Street from Third Avenue East to Swan Street, and on Church Street from McAllister Avenue to third Avenue East and on Windsor Avenue to the hospital.

Available Power Capacity and Usage from SaskPower

As the principal supplier of electricity in Saskatchewan, SaskPower serves more than 445,000 customers and manages \$4.2 billion in assets. SaskPower has over 2,400 permanent full-time employees located in 71 communities.

SaskPower operates three coal-fired power stations, seven hydroelectric stations, four natural gas stations and two wind facilities with an aggregate generating capacity of 3,214 megawatts (MW). SaskPower also has purchase agreements with the Meridian Cogeneration Station, Cory Cogeneration Station, SunBridge Wind Power Project and NRGreen Kerrobert Heat Recovery Project. Total available capacity is 3,668 MW.

SaskPower maintains more than 155,000 kilometres of power lines, 52 high voltage switching stations and 174 distribution substations. SaskPower also operates three wholly-owned subsidiaries - SaskPower International, NorthPoint Energy Solutions and SaskPower Shand Greenhouse.

<i>Source: SaskPower</i>	

SaskPower has three-phase 25 kV power services in Porcupine Plain. The exact electrical requirements from a potential customer will need to be identified once the potential customer has been identified. SaskPower works with customers to ensure the customer has the electricity required to run their facilities. SaskPower is responsible for making electrical service available if required by the customer. Commercial customers typically require 25 kV service (or below) which is available in Porcupine Plain.

The critical issue for SaskPower is the time required to install a transmission service (72 kV, 138 kV, and 230 kV) if required by the customer. Depending on the length of line required, SaskPower can require three years notice to ensure transmission facilities are installed when required by the customer. This lead time typically works nicely with the customer's requirements to build new plants and install equipment prior to needing the electricity to energize it.

Natural Gas services from SaskEnergy and TransGas

SaskEnergy is Saskatchewan's natural gas distribution company, a provincial Crown corporation in operation for over half a century in Saskatchewan.

SaskEnergy delivers the benefits of safe, convenient and environmentally friendly natural gas to more than 347,000 residential, farm, commercial and industrial customers throughout Saskatchewan. SaskEnergy purchases natural gas from independent suppliers and transport it through a 67,000-kilometre distribution system to 92% of Saskatchewan communities.

SaskEnergy Rates Reference Sources	
Service	Rate Information
Residential Rates	www.saskenergy.com/residential/resrates_curr.asp
Business Rates	www.saskenergy.com/business/comrates_curr.asp
<i>Source: SaskEnergy</i>	

SaskEnergy has natural gas facilities in Porcupine Plain.

There are many factors attributing to the availability of natural gas for industrial customers. Specific site location as well as the load requirements of the plant are the most crucial. Once there is a specific site location and specific load requirements, SaskEnergy can prepare a design and cost estimate for natural gas service to the plant.

Generally on larger projects, we require 6-8 weeks for a design and pending the size of the project, construction can require 6-8 months lead time before the natural gas service is installed.

Cell Coverage from SaskTel and any other available providers

SaskTel offers digital cellular coverage across most of the communities in the North East. Recently SaskTel began enhancing services with 3G+ wireless network coverage across Saskatchewan. North east communities will be receiving expanded 3G+ wireless coverage as the network expansion continues during 2011.

Telus offers services across Saskatchewan through SaskTel's infrastructure and will provide 3G+ service access in the north east as SaskTel expands its 3G+ network.

Fire Coverage

Porcupine Plain has a Volunteer Fire Department this is a joint with the R.M. Porcupine #395 all divisions as well as R.M. of Porcupine #426 Division 1. Costs are portioned between all parties on a percentage basis.

The Porcupine Volunteer Fire Brigade, consisting of ten (10) members, provides round the clock protection by utilizing a fire phone system, which connects the caller to the fire hall as well as homes of several members of the brigade.

The Brigade has two pumper/tankers units. Other equipment includes the Jaws of Life and a Self-contained Breathing Apparatus. By agreement additional protection is provided by other fire departments from surrounding communities.

Police Coverage

The Town of Porcupine Plain has a RCMP Detachment in Porcupine Plain located on #343 Walnut Street. In Porcupine Plain we have two constables as well as one corporal.

Porcupine Plain is home to a Royal Canadian Mounted Police (RCMP) Detachment with one (1) Corporal and two (2) Constables. They provide police protection to the towns Porcupine Plain, Chelan, Weekes, Somme as well as the surrounding municipalities.

Airports with Runway Lengths

The Airport for Porcupine Plain is located 1.5 miles north of Porcupine Plain. There are 2 runways and they are both a grass strip. First runway 2,540 x 90 feet. Second runway is 2,550 x 60 feet.
